

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE NASHVILLE DIRECTORY lifts its hat to the active and growing city whose name it bears, and wishes it many returns of this, its Centennial year.

Consolidation being the order of the day, the city of Edgefield, with this issue, loses its identity by being merged into Nashville. With this and other newly acquired territory the city will show a marked increase in size and population, and enable it to take its proper place when the census returns are made up in July. Nashville, confined in its former limits, did not show a population at all adequate to its volume of business.

We would suggest to the City Council the great and urgent need of having the streets re-named and the houses numbered. By reference to the Street Directory it will be found that the names of twenty-three streets are duplicated nine are triplicated, and four quadrupled; and as these streets are from a half to a mile-and-a-half apart, correct information can only be given by naming the wards through which they run.

Our crowded advertising pages and increased subscription list, the largest for ten years, show that our determined efforts to give Nashville a first-class Directory are appreciated. To our patrons, one and all, we return thanks.

Very respectfully,

MARSHALL & BRUCE.

In adjoining column showing the sizes of the different bodies, and their proportions to each other by twelfths of Pica, the present Pica being the standard.

Each size is a factor. Three Nonpareils (6) are a Great Primer (18); Three Breviers (8) are a Double Pica (24); a Nonpareil (6) and a Brevier (8) are an English (14) or Two Line Minton; a Pica (12) and an Excelsior (4)—two six-to Pica leads—are a Columbian (16); a Double English (28) and a Brevier (8) are a Double Great Primer (36); so with all of the other sizes, making the combination of two or more sizes of type in a word, or line, the simplest thing imaginable in composition. That odd body, Bourgeois (9), is now a respectable size, being a Nonpareil (6) and one-half exactly.

Look over the figures and test the simplicity of the new system of Type bodies.

Having withdrawn all our Agencies beyond the limits of our own State, we have restored the EQUITABLE to what it was originally intended to be, purely a State institution.

Our stock is owned by citizens of the State, in all parts of the State, and our Board of Management is composed of leading men from the principal towns throughout the State; therefore, while it is a State Company it is not local or sectional. In patronizing this Company you not only keep the money which you pay for premiums in the State, to increase the general wealth and add to the general prosperity thereof, but you are also lending aid and encouragement to your own county, your own town, your own friends and neighbors.

Having withdrawn our capital from the hazard of conflagrations in large cities, we can offer to you better indemnity than companies so exposed, and we respectfully solicit your patronage,

You know not the day nor the hour when the fire cometh, therefore be ready—with an Equitable policy.

"Wit is the flower of imagination, judgment its fruit." Judgment directs you to insure your property against loss or damage by fire.

ILLUSTRATED CHART

-OF-

UNIVERSAL HISTORY.

THE object of this Chart is to PICTURE HISTORY; to so arrange and tabulate the subjects of history that MEN, EVENTS and NATIONS may be LOCATED IN TIME, as the School Atlas locates places; to enable the reader to readily ascertain the contemporaneous events of the whole world, decade by decade, and century by century, throughout all historic time, by simply tracing the dated lines across the face of the Chart.

The Chart is TWENTY-TWO FEET LONG and about thirty inches wide.

What a map is to localities, this Chart is to events. All that is known of human history is spread out clearly before the eye, quite as plainly as what is known of the earth's surface is delineated on the best map. Its completeness and comprehensiveness are wonderful. It is like an inspiration by the genius of history. *A child can understand it, a sage may study.* As an aid to memory it is unequalled. It is a lightning calculator of history. *Its plan is simple, its utility obvious, and its value as one estimates knowledge.*

NATIONAL SAFETY PAPER.

Patented in the United States, Great Britain, France and Belgium.

This paper is the only sure protection against loss by fraudulent alterations. It should be used for all Checks, Drafts, Notes, Exchanges, Certificates of Deposit, Letters of Credit, Stock Certificates, Railroad Bonds, Legal Documents, and all written evidences of value.

THE NATIONAL SAFETY PAPER fully meets every requirement, and is an absolute safeguard against alterations. It prevents changing of dates. It protects the indorsements and renders the removal of one name and the insertion of another in vouchers of value, impossible. It is the only paper yet known that will stand every test. It involves no extra labor. It is better than any combination of words or figures, punch or stamp.

It is more important to use this paper to protect Checks and Drafts than to use locks and safes for valuables.

Banks and Bankers, for their own protection, should insist upon the use of this Paper, for it is

BUSINESS PRUDENCE TO GUARD AGAINST FRAUD.

At the Paris Exposition the NATIONAL SAFETY PAPER received the HIGHEST AWARD, confirming the numerous awards received in this country.

Thousands of Banking Houses, Insurance Companies and other Corporations testify to the perfect protection afforded by this paper.

During the last five years, it has been used for over two hundred million Checks, Drafts and Exchanges. It has been tested in the severest manner with the most satisfactory results. There has not been a single instance of successful alteration.

HOOK AND LADDER COMPANY No. 1.—Broad corner of S. High.

INSTRUCTIONS TO KEY HOLDERS—Alarms must be given from the box nearest the location of the fire; never give an alarm for a fire seen at a distance.

In giving an alarm, open the door, pull the hook down as far as it will reach and let go.

Each box contains a small bell, which, if heard on opening the box, indicates that the alarm has been previously given. By listening at a box one will learn the number of the box from which the alarm was given. For instance, if an alarm proceeds from box 42, the bells and gongs attached will strike four consecutive blows, then, after a short pause, two, thus: 1 1 1 1—1 1, which will be repeated four times.

Niagara Insurance Company, H. L. CLAIBORNE, Agent, 67 N. College St.

The N., C. & St. L. Ry. OFFERS THE BEST ROUTE TO ALL HEALTH AND PLEASURE RESORTS

POSTAL CARDS.

Postal cards are issued exclusively by the Department. Cards issued by private parties, which contain any written matter having the nature of personal correspondence, other than the address cannot be passed through the mails at less than letter postage, as they are not "postal cards" within the meaning of the law.

In using postal cards, be careful not to paste, gum (except an address tag or label), or attach anything to them. They are un-mailable as postal cards when these suggestions are disregarded.

Postal cards may be forwarded at the request of the party named in the address, the same as letters.

The postage of one cent each is paid by the stamp impressed on the cards, and no further payment is required.

REGISTERED MAIL MATTER.

First, third and fourth-class matter may be registered. First-class matter, or matter on which letter rates of postage have been paid, must always be sealed. Third-class matter and fourth-class matter must be unsealed, fully prepaid at the proper rates, and conform to all requirements. No matter excluded by law from the mails can be registered.

The fee on any registered matter, domestic or foreign, is fixed at ten cents on each letter or parcel, to be affixed in stamps, in addition to the postage. Two or more letters or parcels addressed to, or intended for the same person, cannot be tied, or otherwise fastened together, and registered as one.

MONEY ORDERS.

The money-order system is intended to promote public convenience and to secure safety in the transfer through the mails of small sums of money.

The following instructions are intended to secure payment of the order to the rightful party.

Never send the order in the same letter with the information required on payment thereof.

Be careful on taking out a money-order to state correctly the given name as well as the surname of the person in whose favor it is to be drawn.

See that the name and address of the person taking out the money-order are correctly made known to the person in whose favor it is drawn.

The fees or charges for domestic money orders will be as follows:

On orders not exceeding \$15.....	10 cents.
On orders over \$15 and not exceeding \$30.....	15 cents.
" " over \$30 " " " \$40.....	20 cents.
" " over \$40 " " " \$50.....	25 cents.

THE BEST AND CHEAPEST IN USE.

Metal Roofs Repaired and Painted

WITH OUR RED OXIDE PARAGON PAINT, NO COAL TAR USED.

Shingle Roofs Made as Fire Proof as Iron or Tin.

Read the following from a well known Manufacturer:

LOUISVILLE, KY., January 28, 1880.

W. J. WATSON & Co.—Dear Sirs: We have had on our building an Asbestos roof, in which the Johns Asbestos was used. Very soon after it was put on it commenced to leak, and from that time it was a continual source of annoyance, and every year we had to have it repaired at considerable expense. Three years ago we got you to put on one of your Composition Gravel Roofs. Since that time we have been entirely free from leakage. Our roof has not cost us a cent for repairs, and to-day it is as good as the day it was put on. We cheerfully recommend you roofing.
